

ROCE 5211 - Dosage Calculations for Nurses
40 clock hours Credit Hours

Course Description:

This course is designed to provide students with a comprehensive overview of dosage calculations - a vital part of the nurse's role in providing safe medication administration to patients. It serves to ensure that the patient receives the accurate dose of each medication. Supervisors want to be assured that the dose ordered by the healthcare provider is accurately calculated using the dosage form available and the dosage ordered. The course will allow students to choose what method of dosage calculations work for them and will make the students more comfortable with performing dosage calculations.

This course is intended for LPN students, RN students and licensed nurses. Students waiting to get into a nursing program can take the course to brush up on their math skills before they begin their nursing program. Students who do not satisfactorily complete the math classes in their nursing program can take this course for remediation. It can also serve as a refresher for licensed nurses.
